COVID-19 Policy

The Clermont County Board of Developmental Disabilities (CCBDD or Board) recognizes that many of those it serves are particularly vulnerable to COVID-19. The CCBDD also recognizes its responsibility to provide a healthy, protective, and safe environment for all individuals in the Board’s programs as well as for its staff, visitors, and the community at large. To accomplish this responsibility with respect to COVID-19, it is the Policy of the Board to encourage the Superintendent to monitor and implement appropriate layered prevention strategies as may be recommended by national, state, and local health and governmental agencies including the CDC, Ohio Departments of Health and Education, the Ohio DODD, and also to independently monitor community transmission rates, vaccination coverage, screening tests, and the occurrence of outbreaks. The particular layered prevention strategies implemented by the Board are expected to vary from time to time at the discretion of the Superintendent but may include encouraging vaccination, universal indoor masking regardless of vaccination status, social distancing, screening testing, facilitating increased ventilation, handwashing and respiratory etiquette, staying home when sick, working from home, contact tracing in combination with quarantine and isolation, and cleaning and disinfection, among other means, more or less, as the Superintendent deems appropriate in the best interests of those served by the Board as well as its staff, visitors, and community.
